

Through-the-Wall Vent Kit

Selection Instructions

For Use on G6RA/RK and PGF1RA/RK Series Furnaces

Kit #903196 contains the dilution cover plates and bleed tubes required for converting your furnace from vertical to through-the-wall vent.

Each bleed tube in the kit is marked by a color. The following chart depicts the proper bleed tube for use with each furnace. **NOTE:** No bleed tube is required for the *RA 045C-08 Model. The dilution cover plate necessary for each furnace is also contained in the kit. Cover plate #152530 is for use in conjunction with the red and white bleed tubes. Cover plate #152540 is for use with the clear bleed tube.
