

Light Duty Hybrid Electric Commercial water heaters are available in 40, 50, 65 and 80-gallon capacities & are the most efficient water heaters available

Efficiency

- Up to 4.07 UEF reduces operating cost
- Title 24 Compliant (JA13 Ready)

Performance

- Delivers hot water faster than most standard electric water heaters
- Ambient operating range: 37-145° F is widest in class, offering more days of HP operation annually; designed to meet Northern Climate Spec (Tier 4)

Easy Installation

- Universal top and side water connections
- Duct ready design
- Quick access to electrical junction box
- Easily replaces a standard electric water heater

Integration

- Electronic control for easy temperature adjustment and mode management
- Audible alarm for service alerts
- Built-In Wi-Fi powered by EcoNet® technology* and free mobile app gives users control over water heater, allowing for customizable temperature, vacation settings, energy savings and system monitoring at home or away
- Demand Response Ready with built-in EcoPort/ CTA-2045 port
- LeakGuard™ and LeakSense™ Ready — Easily add leak detection and prevention with leak sensor and shutoff valve upgrade kit

Operation Modes

- Energy Saver
- Heat Pump
- High Demand
- Electric
- Vacation/Away: 2-28 days (or placed on hold indefinitely)

Plus...

- Premium grade anode rod with resistor extends the life of the tank
- Dip tube diffuser reduces sediment improving efficiency and tank life
- 3/4" NPT water inlet and outlet; 3/4" condensate drain connections
- Incoloy stainless steel resistor elements
- Dry-fire protection
- Easy access, top mounted washable air filter
- 2" Non-CFC foam insulation
- Enhanced flow brass drain valve
- Temperature and pressure relief valve installed
- Design certified to NSF/ANSI 372 (Lead Content)

Warranty

- 3-Year limited tank and parts warranty
- See Commercial Warranty Certificate for complete information

Rheem Commercial Electric Hybrid

40, 50, 65 & 80-Gallon Capacities
208-240 Volt / 1 PH
Electric

Efficiency | Units meet or exceed ANSI requirements and have been tested according to D.O.E. procedures. Units meet or exceed the energy efficiency requirements of NAECA, ASHRAE standard 90, ICC Code and all state energy efficiency performance criteria.

Safety and Construction | Safety and Construction: These products are design certified by Underwriters Laboratories (UL) as electric storage tank water heaters. All models are North Carolina and Massachusetts Code compliant. **Certified for a 150 PSI Maximum Working Pressure.**

LEED Points = 3

*WiFi broadband internet connection required.

Hybrid Electric Heat Pump Water Heater Installation Guidelines to Provide Optimal Efficiency

PLEASE NOTE: For all non-ducted applications, ensure that the air exhaust vent is oriented to be at least 6" from any walls or solid surfaces to ensure proper dissipation of cooled air.

Heater: Not Ducted

Room size: Larger than 700 ft³
(e.g. 7' x 10' x 10').

Requirements:
No additional ventilation needed

Heater: Not Ducted

Room size: Smaller than 700 ft³
(e.g. 7' x 10' x 10').

Requirements:
Full louvered door OR
two louvers top and bottom¹

Heater: Not Ducted

Room: Small Closet

Requirements:

- Air gap under door equal to 18 in² (0.75" clearance)
- Louver must be located the same height on door as the air exhaust on heater
- Heater air exhaust must be positioned towards louver within one foot of door

Heater: Ducted With Inlet or Outlet Duct

Room size:
For all closet installations
(size smaller than 400 ft³)

Requirements:
Full louvered door²

Heater: Ducted With Inlet and Outlet Duct

Room size:
Any size room

Requirements:
No additional ventilation needed

MINIMUM CLEARANCES (WITHOUT DUCTING)		
REAR	SIDES	TOP
0"	0"	6"

FOR EASIER SERVICEABILITY		
REAR	SIDES	TOP
6"	6"	6"

PLEASE NOTE: Heat pump water heater will operate in rooms less than 700 ft³ down to 450 ft³ but at reduced energy efficiency and reduced performance output. Reduced energy efficiency and performance has not been evaluated by Rheem Manufacturing and not recommended for optimal performance of the unit.

¹Minimum louver free opening area required for not ducted room installation application will be 3.25 sq ft.

²Minimum louver free opening area required for ducted closet installation application will be 2.9 sq ft.

Hybrid Electric Heat Pump Accessories List

PART NUMBER	DESCRIPTION	USE FOR
AP19134	Leak Sensor	Automatic detection of internal and external leaks
AS50618A	Shutoff Valve	Automatic shut off of water supply to unit
SP20883	Vibration Isolation Kit	Installation on non-concrete floors
SP20884	8" Diameter UL Certified Termination Kit	Termination to the outside or to the attic with 8" diameter
SP20885	7" Diameter UL Certified Termination Kit	Termination to the outside or to the attic with 7" diameter
SP20886	6" Diameter UL Certified Termination Kit	Termination to the outside or to the attic with 6" diameter
SP20887	5" Diameter UL Certified Termination Kit	Termination to the outside or to the attic with 5" diameter
SP20888	8" Collar for Flex Venting	Exhaust only to the outside ducting configuration (no inlet duct)
SP20889	25' Flexible 8" Diameter Duct Kit	For up to 25' of ducting
SP20890	8" Rigid Elbow Duct Kit	Installation in tight places where space needs to be minimized
SP20882	Earthquake Isolation Kit	Metal band restraints for installation in seismic regions
FR-80	Little Firefighter Water Heater Front Restraint	High strength soft woven restraints for installation in seismic regions
UPGRADE KIT		
SP21265A	Kit - Automatic Shutoff Valve Assembly	Add leak detector, shutoff valve and S.O.V. extension harness for top connection setup

Leak Sensor

Shutoff Valve

Vibration Isolation Kit

8" Diameter UL Certified Termination Kit

7" Diameter UL Certified Termination Kit

6" Diameter UL Certified Termination Kit

5" Diameter UL Certified Termination Kit

8" Collar for Flex Venting

25' Flexible 8" Diameter Duct Kit

8" Rigid Elbow Duct Kit

Earthquake Isolation Kit

FR-80

UPGRADE KIT – Add leak detector and shutoff valve to protect from water damage

Leak Sensor & Shutoff Valve Kit

Recommended Specifications (for trade reference only)

Water heater(s) shall be Hybrid Electric Commercial model _____, manufactured by Rheem, having a total unit output wattage of 5.7kW, with a heat pump heating capacity of 1.2kW, and an FHR of _____ and tested to a minimum UEF of 3.83. Water heater(s) shall have a storage capacity of _____ gallons. Water heater(s) shall have the UL seal of certification and be factory equipped with an CSA/ ASME rated temperature and pressure relief valve. Water heater(s) shall be equipped with an integrated heat pump water heating system, electronically controlled with five modes of operation. Those modes being Energy Saver, Heat Pump, High Demand, Electric, and Vacation/Away. The heat pump shall have an ambient air operating temperature range of 37°F to 145°F and meet Northern Climate Spec Tier

4. The control shall be integrated with built in Wi-Fi, allowing for remote control and monitoring. The control shall support demand response, being Title 24 Compliant (JA13 Ready) and having a built-in CTA-2045 adapter. Water heater(s) shall require zero clearance from the rear and sides, with a 6" clearance from the top, and 2" clearance for T&P release. Tank(s) interior shall be coated with a high temperature porcelain enamel and furnished with a magnesium anode rod rigidly supported. Water heater(s) shall meet or exceed the energy factor requirements of ASHRAE. Tanks shall have a working pressure rating of 150 psi, and shall be completely assembled. Water heater(s) shall be equipped with copper, resistered, "screw-in" type elements. Tank shall be insulated with 2" of rigid polyurethane foam insulation. Water heater(s) shall be covered by a three year limited warranty against tank leaks.

In keeping with its policy of continuous progress and product improvement, Rheem reserves the right to make changes without notice.
